

SUN GARDEN POLSKA Sp. z o.o. sp.k., ul. Turecka 36, PL 62-709 Malanów

Malanow, 17.06.2016

**REACH Regulation (EC) No. 1907/2006  
(Registration, Evaluation, Authorization and Restriction of Chemicals)**

**CLP Regulation (EC) No. 1272/2008  
(Classification, Labelling and Packaging of Substances and Mixtures)  
which complements the REACH regulation**

Sun Garden is a manufacturer of products which under the REACH Regulation are defined as articles. The Art. 33 of this regulation obligates us, as supplier of articles, to provide information about SVHC (Substances of Very High Concern) upon request in case there are substances present in a concentration above 0,1 % (w/w) in our product(s).

The European Chemical Agency (ECHA) publishes the so-called candidate list of these substances which is constantly updated: <http://echa.europa.eu/de/candidate-list-table>

We are well aware of this regulation and committed to meeting our legal obligations which also implies a continuous exchange of information with our own suppliers.

Based on the information available to us from our suppliers and to the best of our knowledge, we can confirm that substances of the candidate list as per Art. 59 (1) of the REACH Regulation in a concentration above 0,1 % (w/w) are not intentionally used in the manufacturing of our products.

Should a substance which is contained in our product(s) in a relevant quantity, get added to the candidate list in the future, we will inform about this immediately and make any necessary improvement modifications. In case any changes or substitutions become unavoidable as a direct result from the information received from our chain of supply, we will contact you in order to discuss further course of action.

We can assure you that our specialists are fully aware of their responsibility for the products and will take all needed measures to assure a repeated delivery of high quality goods with the least possible level of inconvenience.

However, we do not perform routine testing on all our raw materials for SVHCs not intentionally added or to determine their concentration. Therefore, we cannot guarantee the absence or level of these substances to any specific limit.

As we frequently receive individualized questionnaires or declaration drafts on REACH, we have developed this standard response format in order to inform all of our customers at the same level about Sun Garden's level of involvement with the regulation.

We hope our declaration will meet your requirements.
